# Muklis Wa-ngah

## SKILLS

- HTML
- CSS
- Javascript
- Photoshop design

## EXPERIENCE

- Making school's website
  - This website was my first project. It's a school that I was teaching.  
I learned from nothing and I learned a lot of things about making this website such as design pages, logos, pictures, text then I learned about coding by using HTML, making beautiful pages by using CSS and making some animations by using Javascript. I learned using github by hosting this site and made a domain name in freenom and also I made them for resolution devices such as laptop desktop Ipad mobile and so on.
- Making portfolios
  - My second website was my portfolio's website. In this case makes me better at coding because I learned a lot in making school's website.  
I design by myself by using photoshop and also made them to be resolution devices.
  - Next, I made my friend's portfolio's website.

## EDUCATION

- I'm studying at Ramkhamhaeng University in Faculty Humanity Major English Minor Science Computer. I will be graduated in 2021.
- The University's location is Ramkhamhaeng Road 24 at Hua Mark, Bangkok District.
